

CJC-1295/Ipamorelin

CAROLINA HORMONE AND HEALTH CENTER

WHAT IS CJC-1295/IPAMORELIN?

CJC-1295 is a synthetically-made peptide that is able to improve your growth hormone levels. This peptide's primary purpose is to boost protein synthesis levels and help fuel the growth of muscle tissues in your body. When paired with Ipamorelin, this peptide can be significantly beneficial for any person hoping to maintain their strength and muscle growth.

BENEFITS

- Promotes slow wave sleep
- Improves memory retention
- Stimulates muscle growth
- Aids in fat loss & lean muscle
- Strengthened immune function

POSSIBLE SIDE EFFECTS

- Injection site reactions (pain, redness, swelling)
- Flushing of the face
- Dizziness
- Headache
- Hyperactivity

ADMINISTRATION

Daily at bedtime by subcutaneous injection

INVESTMENT

\$270 per vial/order

**Number of vials needed each month varies per patient*

NEXT STEPS

Schedule an appointment at your local CHHC office to meet with our Patient Advocate to discuss if CJC-1295/Ipamorelin is right for you.
