

Sermorelin/Ipamorelin

CAROLINA HORMONE AND HEALTH CENTER

WHAT IS SERMORELIN/IPAMORELIN

Sermorelin is a peptide with 29 amino acids. It operates by stimulating your pituitary gland so it produces its own growth hormone that helps to stop, and even reverse, effects of aging. It can also improve your skin and hair all while enhancing sleep quality and speeding muscle repair.

Ipamorelin is a growth hormone releasing peptide (GHRP) that stimulates the pituitary gland within the body to release natural growth hormone (GH) that can reverse age-related bodily deterioration.

BENEFITS

- Improves lean muscle mass
- Supports immune system
- Improves sex drive
- Improves quality of sleep
- Improves energy and endurance
- Supports bone density
- Improved skin elasticity
- Improves cognitive function and memory
- Possible 5-10% reduction in body fat
- Possible 10% increase in lean muscle mass

POSSIBLE SIDE EFFECTS

- Dizziness
- Headache
- Sleepiness

ADMINISTRATION

Daily at bedtime by subcutaneous injection

INVESTMENT

\$295 per vial/order

**Number of vials needed each month varies per patient*
